

Blurring Climate Boundaries: The Impact of Standardised Building Practices Across Nepal's Diverse Climates

WEATHER
Nepal's cold months get unusually warm
 Department of Hydrology and Meteorology had predicted a hot and dry winter this year. This winter, no district in the Terai region has witnessed cold wave conditions so far, meaning that no one died from the cold. People across the country have not felt the typical chill of winter days, and many people are now saying they have not experienced any noticeable cold this season. "I have never experienced such a warm winter," said Rajendra Thapamagar, a resident of Tarakes. **Preserve Traditional Housing With Thermal Comfort** because

Each region exhibits distinctive housing patterns, cultural differences, and adaptive behaviours to mitigate thermal discomfort. Traditional construction skills, which aim to improve indoor thermal conditions, have been passed down through generations

Rising domestic demand spurs Nepal to halt electricity exports amid dropping temperatures

KATHMANDU, Dec 17: With the onset of the dry season i.e. winter, there has been an increase in the demand for electricity in Nepal. The Nepal Electricity Authority (NEA) said that the demand for electricity in Nepal has also increased with the increase in the use of AC, heaters and other devices by the general public to ward off winter.

Rising Heat Waves: Killing the Innocent

Another victim was Thaneswor Pariyar, a member of the Dalit community from Arghakhachi in Kapilbastu District. Dehydration took his life. And it's not just them. Raj Mangal Ray Yadav, a 52-year-old cyclist, met the same fate due to the scorching heat.

From hills to Terai, heatwaves push demand for ACs

Import of ACs has increased by 43.62 percent to Rs2.93 billion in the first 10 months of the current fiscal year, government data show.

Terai grapples with health risks from extreme heat conditions

KATHMANDU, June 3: Since the last few days, excessive heat has been reported in various parts of the country which will continue for the next few days. The Department Hydrology and Meteorology (DHM) has requested the general public to take necessary precautions and to avoid venturing out during the daytime especially in the Terai as there is a possibility of hot air and heat wave in the next five days.
